february 15 2016 was the beginning of a debate on man made climate change between two well known experts in the field dr william happer and dr david karoly hosted by james barham and his team at thebestschools.org both have been heavily involved in atmospheric research since the 1980s happer believes that burning fossil fuels will have a minimal effect on climate but a large benefit to plant life and humanity karoly believes the opposite how certain is the conclusion by some scientists that burning fossil fuels will lead to a climate disaster only debates can ferret out their

certainty or lack of it burning fossil fuels may cause some harm but if we stop burning them we will face certain harm which is worse debates educate the public they are necessary this is an in depth look at both sides of the debate between two prominent experts

this volume develops the concepts and methods of critical zone analysis in the south asia context critical zone analysis is a new way for the humanities to recompose narratives to do with climate change and other critical environmental problems through literature the sciences and science and technology studies extending the legacy of bruno latour the diverse contributors in this book demonstrate that scholars of southern asia have much to offer the environmental humanities during this conjuncture where the modernist conceptual architectures are falling apart under the pressure from threatening future scenarios certainties about western versions of progress are challenged in this book not only by material planetary limitations but also by decolonizing assertions about alternative modernities and territorially sustainable ways of life among indigenous peoples part of the critical interventions in theory and praxis series this book will be an essential read for scholars and researchers of environmental humanities climate change sociology literature science feminism gender studies and south asian studies
